

PRECISE PERMITS

A Building Department Processing Service

Hi I'm Donnis Eninger, President of PRECISE PERMITS INC. I want to welcome you to our website. Thank you for your interest in our company to handle all of your building department processing needs.

I appreciate as a professional or homeowner that you realize there are specialists that can be of benefit to you. The southern California building industry has been hard hit by the economic downturn. As building departments are laying off personnel they are a backlog of frustrating bureaucracy. Our experience puts us at the right place, with the right person, in a minimal amount of time. And especially in this field, time IS money! Also, the construction professional needs to understand that their time is too valuable to be floundering in an area where they are not experts.

Our service has been "processing" at all of the building department jurisdictions in the San Diego county area since 1987. No project is too large or too small. To our credit we have processed several high-rises in downtown San Diego along with many area subdivisions and a multitude of other new construction, but the tenant improvements and residential additions are a very big part of our business. We are a service that caters to the needs of our client.

The fee and billing structure is simple. Our competitive fees are computed at \$90.00 per hour and \$0.40 per mile (this does not include the project's building department fees). You receive an in-depth accounting of the time spent on your project and the billings are sent monthly or at the completion of the project. You can click onto our service agreement at the bottom of the homepage.

If you have a permit that you need to get in the San Diego county area, please consider PRECISE PERMITS INC. We can facilitate your Discretionary, Building, Engineering, Electrical, Mechanical, Plumbing, or Sign permits; Health department and Hazmat permits; Records and property research; or any other building department tasks. Our professional staff and expeditious service will be a value to your business.

Sincerely,
Donnis Eninger, President
PRECISE PERMITS, INC.
